## ABOUT US

**BHOOMI INFRA** is owned and operated by **Rajviz Private Limited** company, founded by Mr. Vishnu Angarakhe, possessing 30+ years of experience in the construction and infrastructure industry, which provides solutions to the construction industry across Maharashtra.

Our expertise is providing you with high-quality concrete ready-mix across Mumbai MMR regions.

We are preferred construction solution and advisory company for construction developers all across Mumbai MMR regions, owing to our commitment to deliver excellence in construction material.

At our company, we pride ourselves on having a team of highly experienced professionals who are dedicated to delivering exceptional service for all your construction needs. Our team possesses superior customer service experience and knowledge in the industry, allowing us to meet all of your concrete needs, regardless of size or complexity. Moreover, we have conducted extensive research in the industry to ensure that our products and services are of the highest quality. No matter the size or complexity of the project we emphasize safety in all aspects of our operations.

Our ready-mix concrete is perfect for a wide range of applications, including foundations, driveways, sidewalks, and more. Our modern facility and sophisticated concrete mixing software ensure that our products exceed industry standards and go above and beyond design specifications for any type of project.

We understand and appreciate the value of your business, so we have made it our mission to provide you with quality concrete ready-mix and reliable services. We deliver in large or small quantities to homeowners, contractors, and municipalities, you can depend on us for your next home improvement project or large commercial project.

A large-scale construction site under a clear blue sky. The main structure is a multi-story concrete building with a grid of columns and beams. Scaffolding is visible on the right side. In the foreground, there is a dense network of rebar for a concrete slab, with several large concrete pipes lying on top. A white concrete mixer truck is parked in the bottom right corner. Two yellow tower cranes are visible, one on the left and one on the right. The overall scene is one of active construction.

**BUILDING A SOLID FOUNDATION**

# CONCRETE

The value and importance of concrete in our daily life is often underestimated or overlooked. Concrete has been used for thousands of years, dating back to the Roman Empire. It is currently one of the most used construction materials in the world and shapes our communities in the form of buildings, homes, roads, curbs, bridges and much more.

Concrete and cement are often confused as the same material. In fact, cement is just one ingredient found in concrete, which is actually a combination of sand, stone, cement, water, and a variety of additives. The combinations are extensive and used to produce concrete of varying styles, strengths and characteristics depending on the desired application. Ready Mix concrete is a highly scientific and specific science.
